

## Screenshots

When the application starts, it will first go to the login page (see Figure 1). Clicks on the “Create an account” link, it will go to the create account page. If the email that user tries to register is already in use, it will show a message to notify user (see Figure 2).

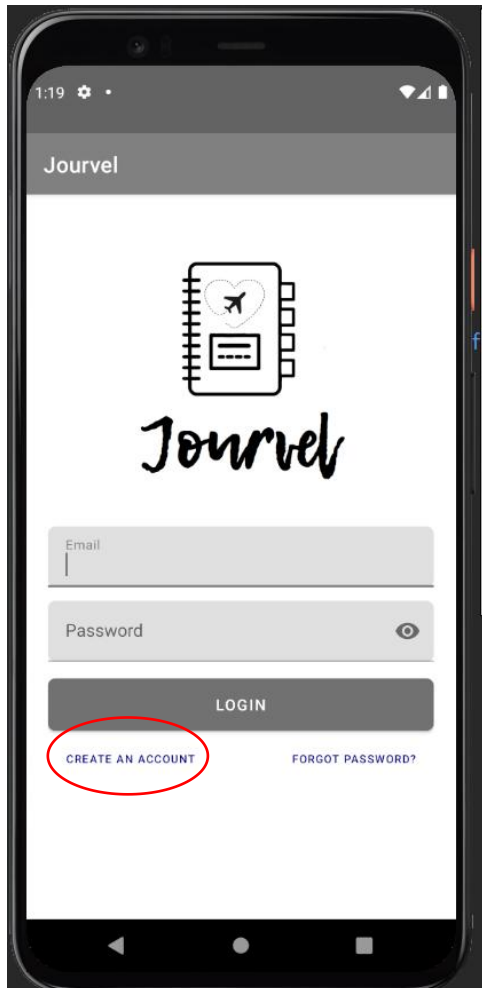

Figure 1 Login Page

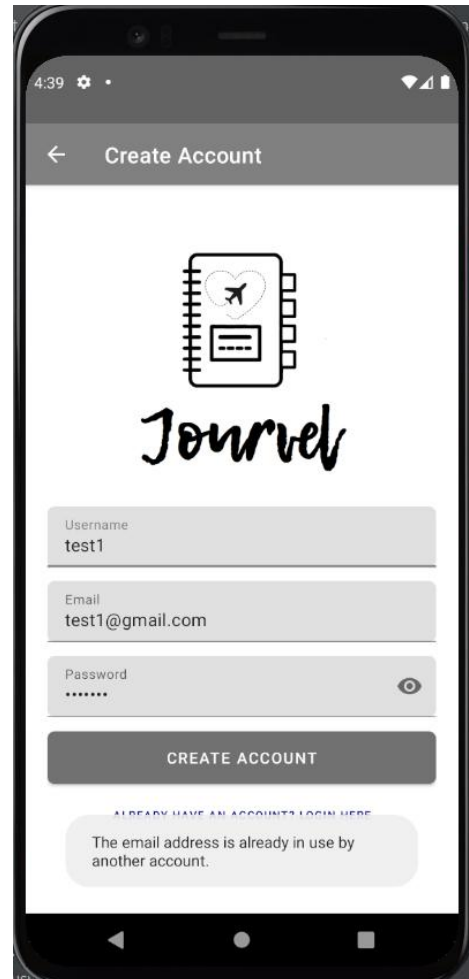

Figure 2 Register Page

After successfully registered an account, it will bring user to the home page. In the home page, it will show the latest posts to the user (see Figure 3). The popular and following tab on the top are not available yet. The like, comment, save functions are also not developed yet. User can scroll up and down to browser the home page (see Figure 4). User can also click on a website link provided inside the post.

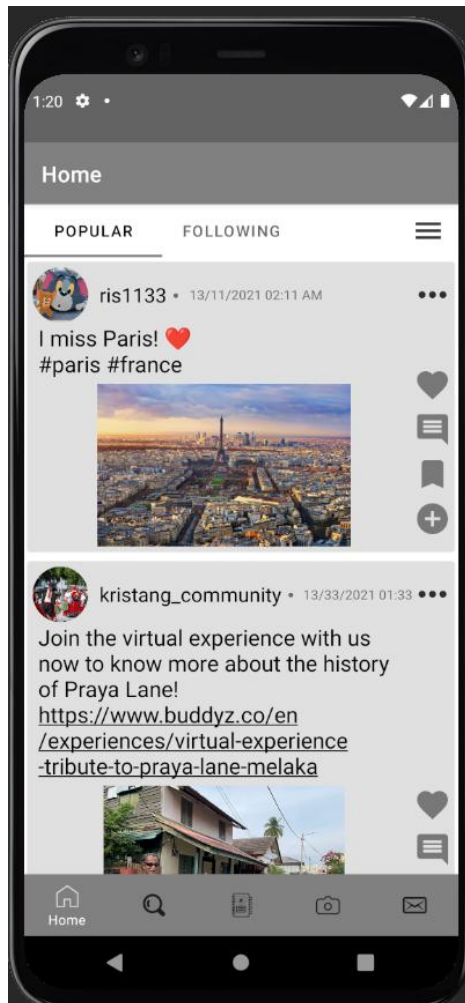

Figure 3 Home Page

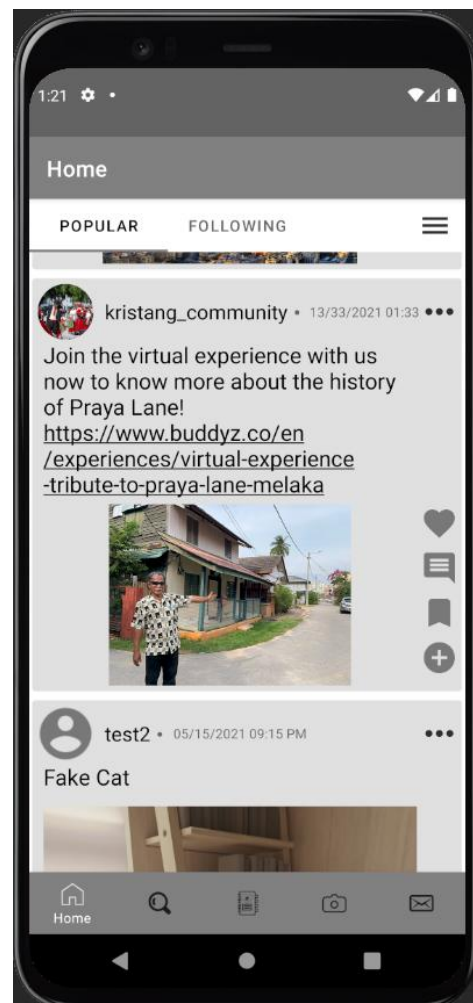

Figure 4 Home Page (scrolling)

For new user, the profile page will be lack of information because the user has not yet input his/her information (see Figure 5). User can click on the edit button on the top to edit the profile page. It will show four options to let the user choose what to edit (see Figure 6).

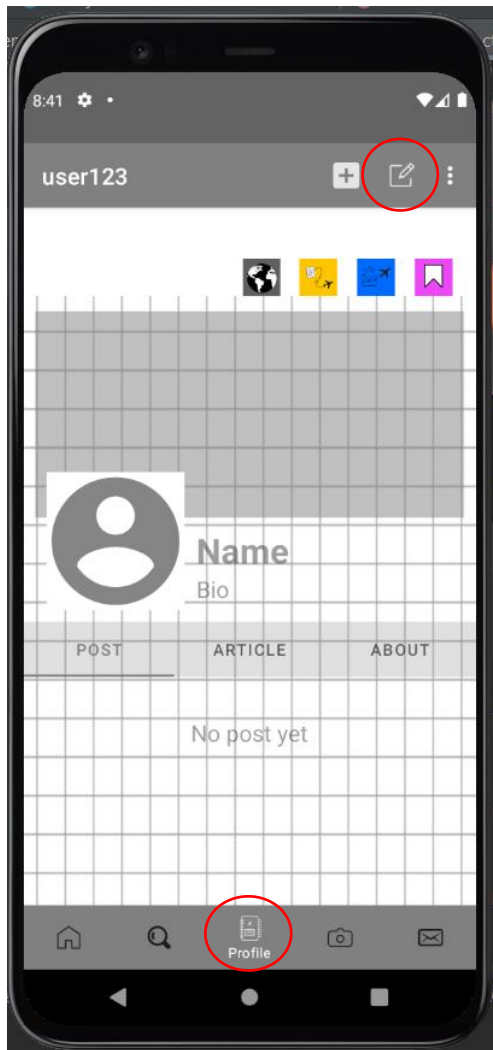

Figure 5 Profile Page (Journal)

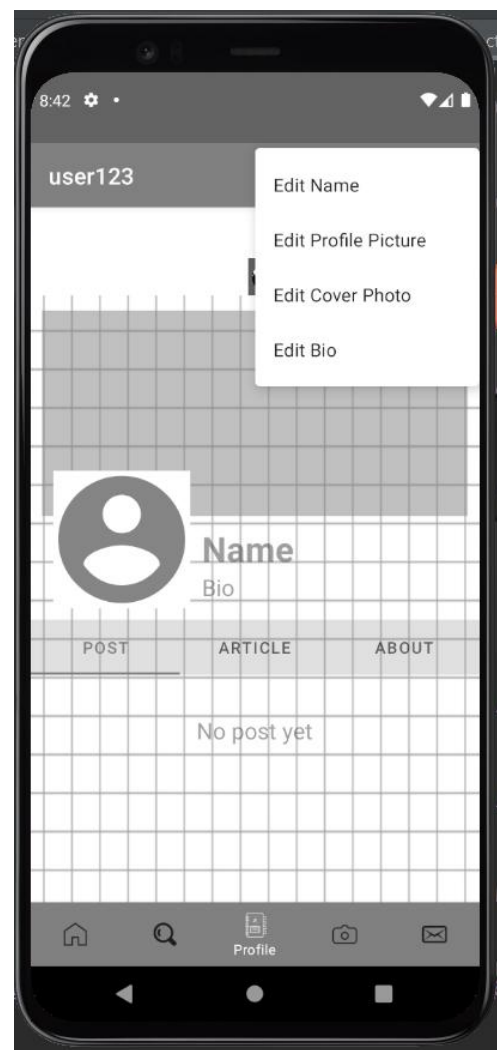

Figure 6 Profile Page (Edit Profile)

If user chooses to edit name, it will pop out a dialog to let user to enter the name that the user wants (see Figure 7). Click on the update button, then the profile page will automatically update user's name (see Figure 8).

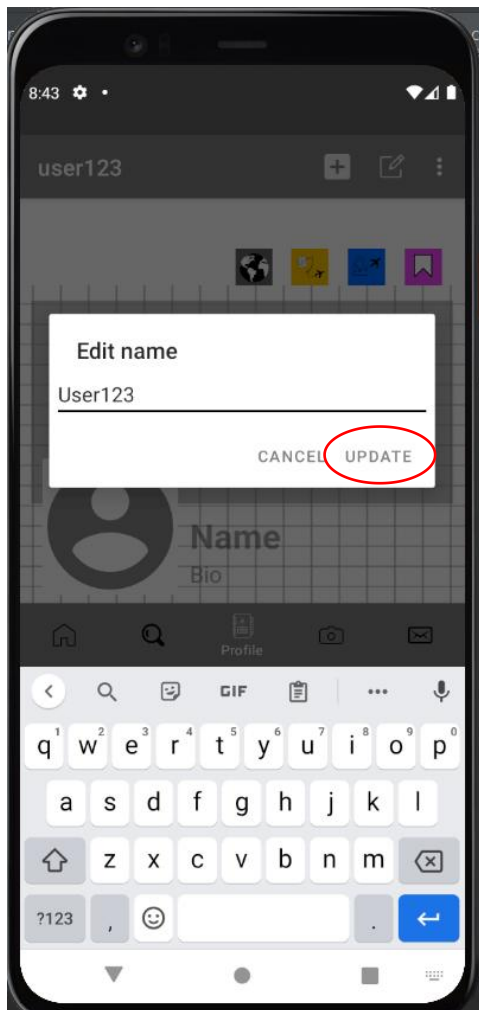

Figure 7 Edit Name

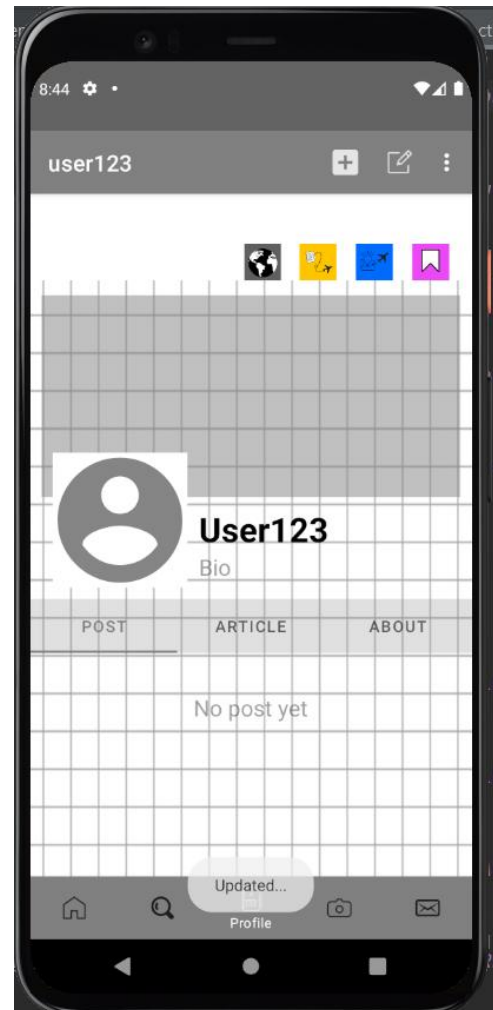

Figure 8 Updated User's Name

If user chooses to edit profile picture, it will ask user permission on accessing phone's camera and gallery. After user chooses "allow", then it will ask which way that the user wants to choose the photo for the profile picture (see Figure 9). Every time it will display a progress dialog to notify the user when editing or adding something (see Figure 10). After successfully changed the profile picture, it will automatically show in the profile page. User can also edit the bio and cover photo (see Figure 11).

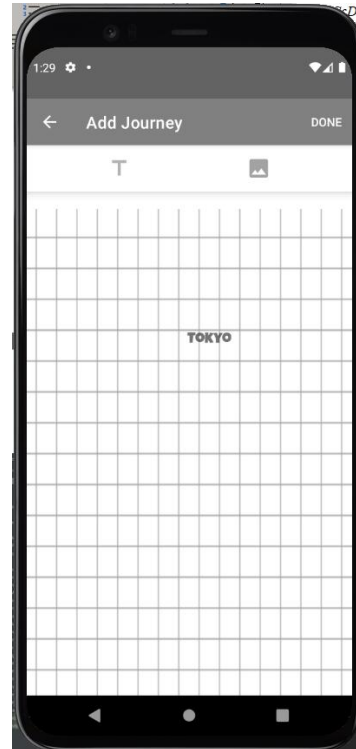

Figure 22 Text Added

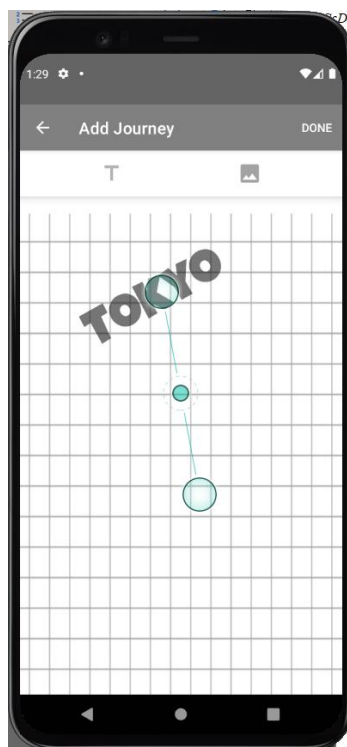

Figure 23 Drag/Resize/Rotate Text

If user chooses to add picture into the content, it will also ask user the way to add a picture (see Figure 24). User can also drag, resize, and rotate the picture (see Figure 25).

Figure 24 Select Image

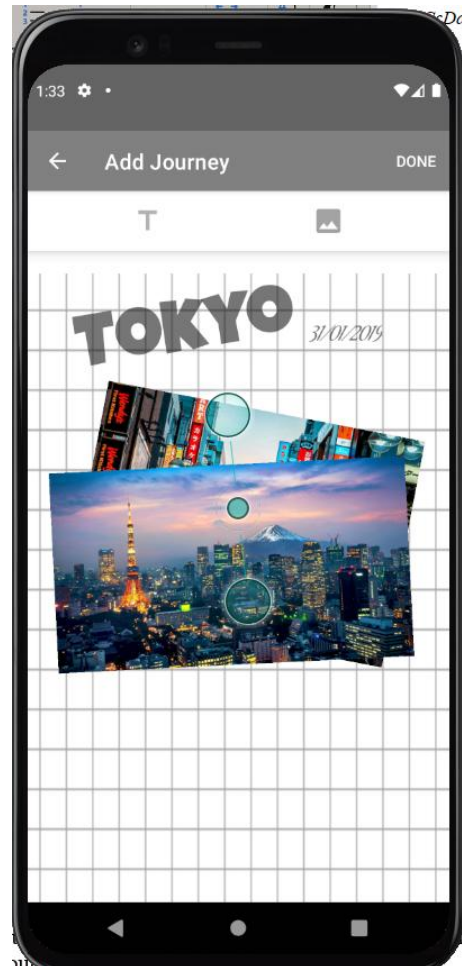

Figure 25 Drag/Resize/Rotate Image

When done, user can click on the done button at the top and it will show that the system is adding the content (see Figure 26). If user doesn't want to add the content, user can click on the back button instead of the done button. After successfully added the journey, user can click on the yellow tab to go to the journey page and view all the journeys that the user has added (see Figure 27).

Figure 26 Click Done

Figure 27 View Journey Page

User can scroll horizontally to see other journeys that the user has added (see Figure 28). User can also choose to delete any journeys by clicking the three-dots icon button and choose the delete option (see Figure 29). It will notify the user when successfully deleted and the deleted journey will be removed from the screen.

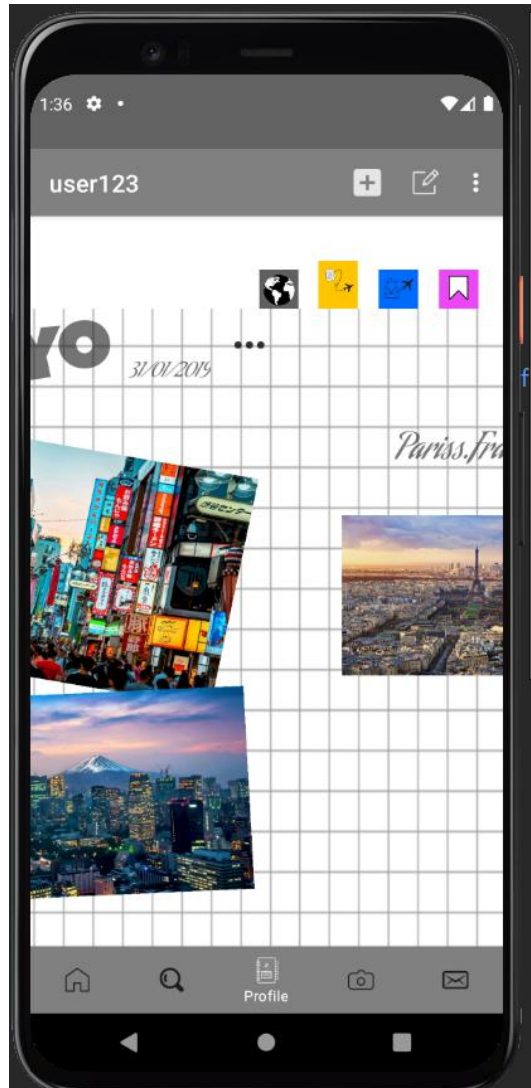

Figure 28 Scroll Journey Page

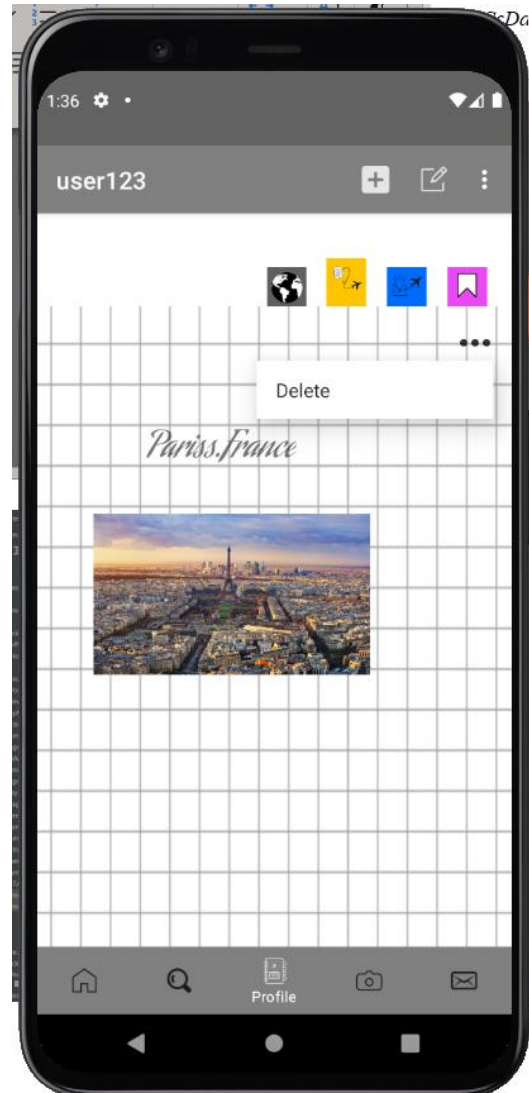

Figure 29 Delete Journey

User can search any posts, articles, or users in the search page (see Figure 30). Currently, the search page only can search for posts. Below the search bar, it will display some recommended posts, articles, or users to the user, but it is not yet developed. User can enter any keywords and the result will automatically show at the bottom (see Figure 31).

Figure 30 Search Page

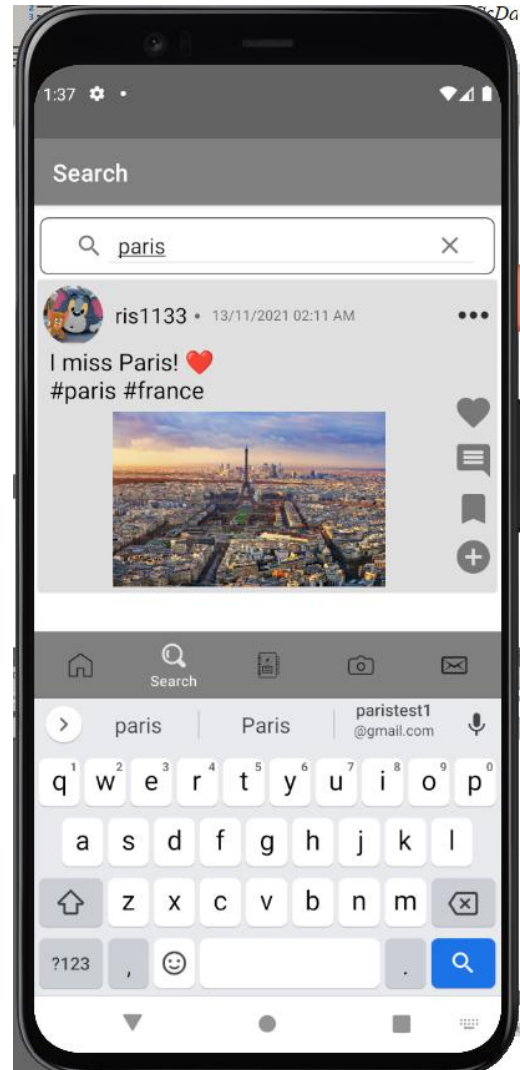

Figure 31 Search by Keywords

The journal (profile page) will also provide a world map page to let the user to label the places inside the world map, but it is not developed yet. User can click on the grey world icon tab to see the world map page (see Figure 32).

Figure 32 World Map Page

User can also add plan to the journal. The function of adding plan is same as adding journey due to the lack of time. The user can view their plans on the plan page by clicking the blue tab (see Figure 33).

Figure 33 Plan Page

User can save any posts or articles to the save page, but it is not developed yet. To view the save page, user can click on the pink tab (see Figure 34).

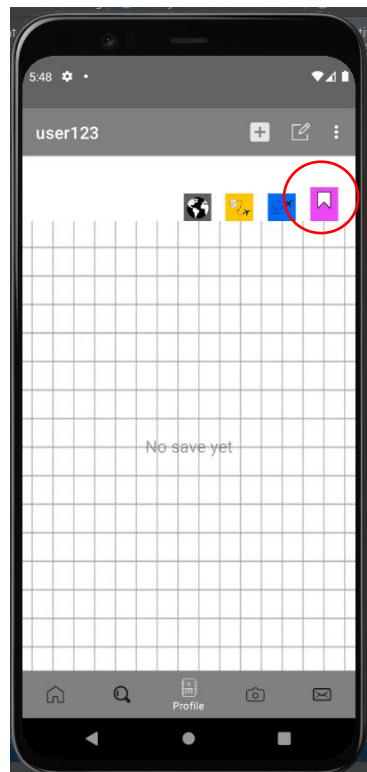

Figure 34 Save Posts Page

To view the article page, user should click on the profile tab at the below to go to the profile page and click on the article tab (see Figure 35). (Add article function is not available yet.)

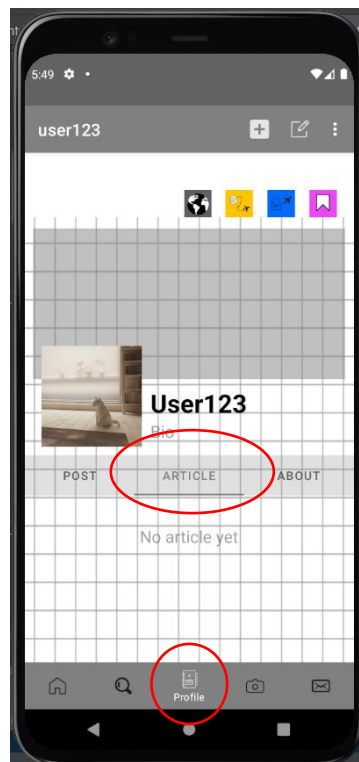

Figure 35 Article Page

Camera page is to let the user take picture when traveling (see Figure 36). It is not developed yet.

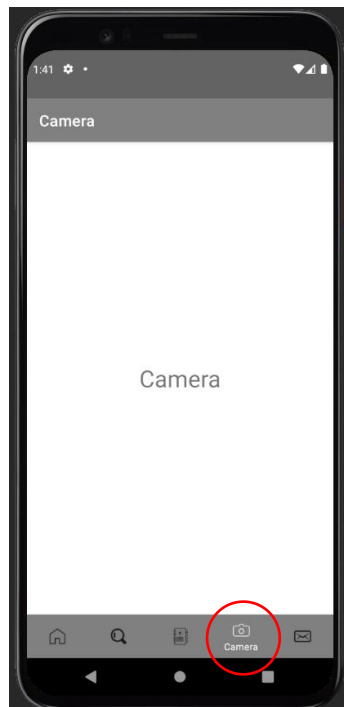

Figure 36 Camera Page

Message page is to let the user see the notification of the application or chats with other users by clicking the notifications tab or the chats tab (see Figure 37). However, both are not developed yet.

Figure 37 Message Page

To log out, user needs to go to the profile page and clicks on the top right button. It will then show the log out option, click the option to log out. After clicking the log out option, it will automatically go to the login page (see Figure 38).

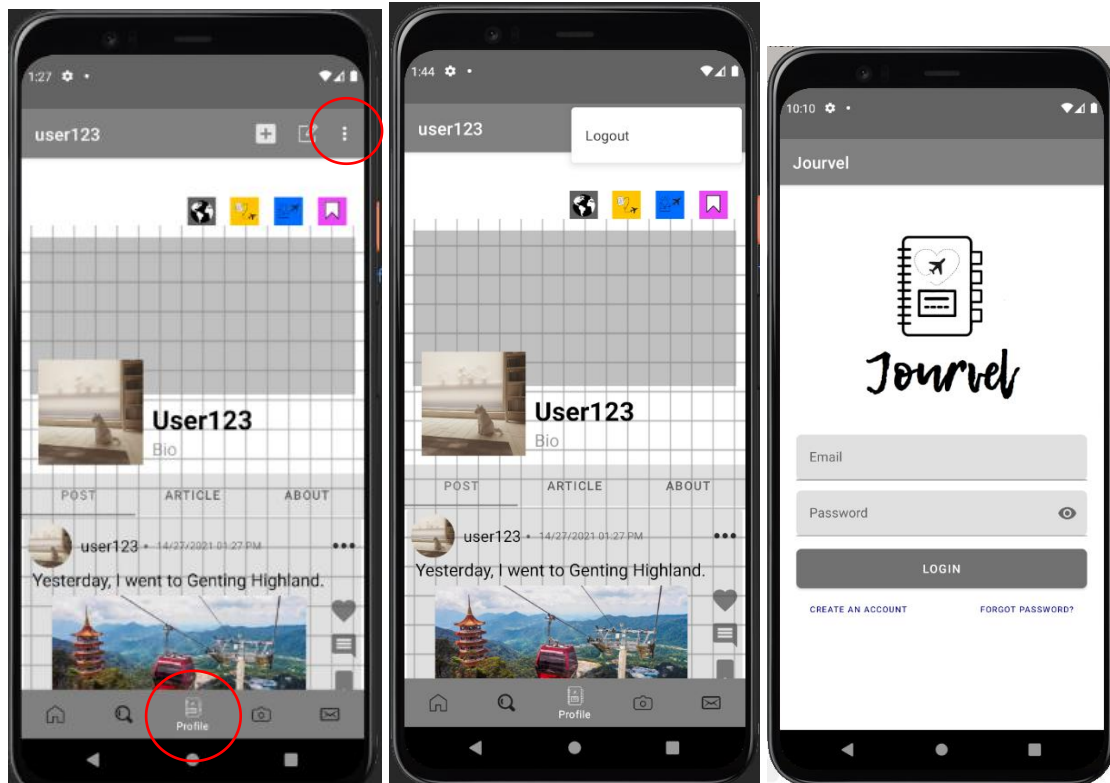

Figure 38 Logout

If user tries to log in again, but the entered password is wrong, it will notify the user as well (see Figure 39). If user forgot the password, user could click on the forgot password link button to recover the password. User only needs to key in and submit the account email, then an email will send to the user's email to let the user changes the password (see Figure 40).
